

SOCIETY OF WOMEN ENGINEERS SPACE COAST SECTION

September 8, 2008

Dear Educator,

The Space Coast Section of the Society of Women Engineers (SWE-SC) is now accepting applications for their annual scholarship program. This program has been providing scholarships to graduating senior women choosing to further their education in the areas of engineering, computer science, or mathematics. This year, SWE-SC will also be awarding a "Teacher Incentive Award" to an educator and encourager of the applicants for the annual scholarship.

Statistics have shown a decline in young women choosing to enter male-dominated careers. In the interest of encouraging young women to pursue careers in mathematics, science, and engineering, SWE-SC would like to extend the opportunity for you, as an educator and encourager of women choosing to further their education in these fields, to be presented the "Teacher Incentive Award."

To receive the "Teacher Incentive Award," you must write the Letter of Reference for an applicant for the Space Coast Section Society of Women Engineers Scholarship. The Letter of Reference is part of the Scholarship application package required for each scholarship candidate. Information on this scholarship can be found at <http://www.swe-sc.org>. For each letter of reference, your name will be entered in a drawing. The winner will be notified in February.

The SWE-SC thanks you in advance for encouraging the young women of today to be the engineers of tomorrow.

For questions and answers, please contact me via email: at amandacmuller@hotmail.com.

Sincerely,

Amanda C. Muller, Ph.D.
Scholarship Committee Chair
